

CAPITAL READINESS ASSESSMENT

Loco Financial Technologies

An independent evaluation of investment readiness across commercial, financial, operational and legal domains — with a structured 18-month improvement roadmap.

01 Company Profile

Who Loco Financial Technologies is, and the context of this capital readiness assessment.

COMPANY OVERVIEW

Loco Financial Technologies is a Financial Technology company operating in Tanzania. This report evaluates its readiness to raise external capital across four domains — commercial, financial, operational, and legal & compliance — using the Capital Readiness Assessment (CRAT) framework, and sets out the roadmap required to reach investment readiness.

02 Executive Summary

Domain performance against the 70% investment-readiness threshold. 2 of 4 domains clear the bar; the remainder require focused remediation.

SUMMARY

Loco Financial Technologies achieved an overall Capital Readiness Score of 46%, remaining below the 70% investment-readiness threshold. Commercial and Financial are investment-grade, while Operations and Legal & Comp. represent the highest-risk capability gaps. The priority is to close these gaps through a structured 18-month improvement roadmap.

03 Overall Readiness Score

Where the business sits on the startup maturity curve, and the capabilities most likely to influence investor due diligence.

04 18-Month Score Projection

Modelled trajectory of the overall readiness score as the improvement roadmap is executed. The 70% threshold is reached by month nine.

05 Key Thematic Gaps & Risk

The specific capability gaps behind each domain score, ranked by their impact on investor due diligence.

Commercial / Market

72%

ON TRACK

- › Sales process and revenue pipeline need stronger structure.
- › Market positioning and competitor intelligence should be documented.
- › Customer retention and acquisition channels need measurable controls.

Financial Management

80%

ON TRACK

- › Cash flow forecasting should be formalised.
- › Investor-grade financial records should be prepared.
- › Accounting systems and projections need stronger controls.

Operations

13%

HIGH RISK

- › Core processes should be documented.
- › Key-person dependency should be reduced.
- › KPIs should be linked to performance management.

Legal & Compliance

17%

HIGH RISK

- › Licences, permits, contracts and governance records should be reviewed.
- › Compliance gaps may delay investor due diligence.
- › IP and formal oversight structures should be strengthened.

CONSOLIDATED RISK ANALYSIS

The consolidated risk profile indicates that Loco Financial Technologies should prioritise investment-readiness controls that directly affect due diligence: revenue predictability, financial transparency, operational resilience and legal compliance. The current overall score of 46% means corrective action should be sequenced by impact and investor relevance.

06 Readiness Improvement Roadmap

Three sequenced phases move the business from stabilisation to full investor readiness over 18 months.

0-3 MONTHS

Immediate Stabilisation

- Formalise financial records.
- Confirm licences and permits.
- Document core processes.
- Prepare investor information pack.
- Set up basic sales tracking.

3-9 MONTHS

Control Building

- Implement accounting software.
- Build rolling cash-flow forecast.
- Formalise contracts.
- Implement CRM pipeline tracking.
- Launch structured team training.

9-18 MONTHS

Investor Readiness

- Establish governance structure.
- Register IP assets.
- Prepare audited financials.
- Strengthen commercial traction.
- Reassess against 70%+ target.

CONCLUSION & RECOMMENDATIONS

The most important opportunities are financial management, legal compliance, operational documentation and commercial strategy development. Recommended next steps: use the CRAT framework as an ongoing monitoring tool, prioritise domain-specific gaps, engage specialist advisors, and schedule a follow-up assessment within 12 months.

07 Prioritised Initiatives

Quick wins are high-impact actions requiring fewer resources — sequence them first. Bold plays require more effort but deliver greater readiness gains, sequenced across the 3–18 month programme.

● QUICK WINS

High impact · fewer resources

- 1 Formalise financial records
- 2 Confirm licences & permits
- 3 Document core processes

● BOLD PLAYS

Greater effort · greater readiness gains

- 4 Implement CRM pipeline
- 5 Build cash-flow forecast
- 6 Prepare audited financials
- 7 Establish governance structure
- 8 Register IP assets

SEQUENCING

Sequencing follows impact and investor relevance: stabilise the highest-risk domains first with the quick wins, then build the durable controls — CRM, audited financials, governance and IP — that carry the business past the 70% readiness threshold.
